Scope and analysis of project:
Working title:cricRGUKT

Manually updating the scores of the ongoing match by the admin i.e the one who has created the match, so that the user can know the match's details.

The website can be accessed through mobiles or desktops.

It provides complete information about the match; the bowler, the batsmen, teams playing, score , details of an over and details about a particular player, etc.

It also contains details of previous matches and further scheduled matches.

The admin must take care of score updates, they must make sure that no incorrect update is done.

The above things will help the user to be more involved in the match by admin providing accurate details.

There are 2 end user for this project , the admin and the user.

The project is estimated to be completed in a duration of 1 month.
